### Zscores

`zscores[i][j]` returns the zscore for ith sample in jth probe

Var: `self.apidata['apiinfo'][i]['zscores']`

Func:

`zscores ~ age + race + gender + specimen` in `performAnova()`

### Samples

`samples[i]['sample']['mri']` returns a coordinate in MRI coordinate space.

Var:

`self.apidata['apiinfo'][i]['samples']`

Func:

Use `set_ROI_MNI152()` and `transformsamples()` to figure out which of the above coordinates belong to the corresponding ROI.
